# STEVENS

Inspired by the care you deliver

Medical Device Reprocessing

Sterilization

RS120A Rotosealer

- Offers practical means for monitoring of sealing parameters
- Temperature is adjustable from 100°C to 200°C, with a tight tolerance of ±1% only, and its control is in conformance to DIN 58953-7
- Default setting for the sealing pressure is at 100N ±5%, but depends on the thickness of the material to be sealed. The upper limit is adjustable
- The display shows a warning and a sound alarms upon incorrect values

#164-RS120AV

WIPAK STERIKING®

1. **Visual check of the seal integrity**
   When sealed, the film turns to darker green, so you can check that the seal is undamaged and detect any defects.

2. **Superior peel of seal**
   Pouches feature a specially designed peel-off seal to facilitate opening. Note the correct peel-away direction.

3. **Strong performance**
   The seal, comprising several narrow parallel seams (Multiline), is extremely strong and durable yet peels off cleanly.

4. **Sealed edges**
   Heat-sealed upper corners reduce the risk of dust contamination when opened.

5. **Easier opening**
   Thumb notches at each end make it easier to fill and open the pack.

6. **Print design safety**
   Indicators and text imprints are outside the actual packing area to avoid the risk of ink contamination.

7. **Manufacture traceability**
   Each Steriking® package carries a lot code that states its manufacture year and month (YYMM).

8. **Process indicators printed on the packs**
   EN 867-2 compliant, providing clearly contrasting color changes.

9. **Exclusive materials**
   Made of a tough and flexible multilayer plastic film and high grammage medical grade paper.

10. **Compliant with EN 868-5**
    Transport cartons labelled with a CE-mark. All Steriking see-through packages are manufactured in highly controlled Clean Room conditions to minimize the bioburden of materials.

WIPAK STERIKING®

Clear Flat Rolls and Pouches
Ideal for individual items, heavier and larger items, and smaller sets

Seal Integrity and Validation

Steriking® Multi Seal Test Kit

For testing the integrity of the seal made by any Rotosealer™ units.

Kit Includes:
- Seal control sheets
- 80mL bottle of integrity test dye
- Stopwatch
- Registration card
- Instructions for use

#164-MS300
box of 250

Steriking® Seal Control Sheets

- A practical Seal Control Sheet for daily heat-sealer validation and seal quality test
- Made from the same material as the Steriking® sterilization pouches

FUSED TWO COLOUR
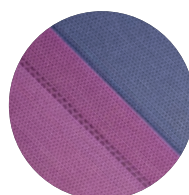

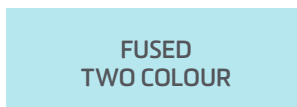

Instrument Cleaning Guide

Spaulding's Classification of Medical Equipment/Devices and Required Level of Processing/Reprocessing

Classification	Definition	Level of Processing/Reprocessing
Critical Equipment/Device	Equipment/Device that enters sterile tissues, including the vascular system	Cleaning followed by Sterilization
Semi-critical Equipment/Device	Equipment/Device that comes in contact with non-intact skin or mucous membranes but does not penetrate them	Cleaning followed by High Level Disinfectant (as a minimum requirement). Sterilization is preferred
Noncritical Equipment/Device	Equipment/Device that touches only intact skin and not mucous membranes, or does not directly touch the client/patient/resident	Cleaning followed by Low Level Disinfectant (in some cases, cleaning alone is acceptable)

Cleaning

Never keep used/dirty instruments in a dry container. Make sure BLOOD and DEBRIS don't have a chance to dry. If you are unable to process them right away use:

An Enzymatic Cleaner to help to remove organic material
#042-EBL1HC   Enzyclean® instrument cleaner, pre-soak single, 1 gallon
#517-10-4100   EmPower™ dual enzyme instrument cleaner, 1 gallon

Or a neutral pH detergent:
#042-B1HC   Low suds instrument cleaner, 1 gallon

Always rinse off chemicals with distilled water.

ULTRASONIC CLEANING is usually recommended as the best way to clean surgical instruments.
#594-CSU1   Ultrasonic cleaner, 1 gallon

MANUAL CLEANING: Use stiff brushes to make sure all visible dirt is removed.
#444-10-1651-X   Nylon bristles instrument brush

Use a surgical instrument cleaner
#071-002900   Organisol instrument cleaner, 4lb container, with scoop

Make sure everything looks sharp and all moving parts are working correctly.

High-Level Disinfection

Keep in mind safety, efficacy, compatibility, and the environment.

Accelerated Hydrogen Peroxide
Not recommended for instruments with brass, copper, or tungsten carbine.

Prevention—5-minute HLD for respiratory and plastics. 6-hour chemosterilant
#909-11505   4L bottle

CS20—20-minute chemosterilant
#909-11405   4L bottle

Sterilization

It is recommended that all surgical instruments be autoclaved, if possible.
#144-M11-042   Midmark M11 autoclave, 11" x 18" chamber

Always use distilled water in your autoclave.
#781-AQ00334   Distilled water, 4L, case of 4 (Western Canada Only)
#320-72404   Distilled water, 4L, case of 4 (Ontario, Quebec and Eastern Canada Only)

Lubricate all moving parts.
#162-3-705   Instrument lubricant, 1 gallon

Use self-seal pouches to autoclave and store your instruments.
#164-SS1   Self-seal clear pouch, 3.5" x 8", box of 200
#164-SS2   Self-seal clear pouch, 3.5" x 10", box of 200
#164-SS4   Self-seal clear pouch, 5" x 10.5", box of 200
(Other sizes available)

Use chemical or biological indicators regularly to ensure
your autoclave is working properly.
#800-1243B   Steam sterilization integrator, bag of 100
#800-1262P   Attest® biological indicators, box of 25
#800-116   Attest® biological indicator incubator

For instruments that can't be autoclaved or only
require High Level Disinfection (HLD), use a chemosterilant soak.

Check with your Territory Manager to see what cold soak is right for you.

Environmental Infection Control

Disinfectants

#009-28+   BM-28 PLUS™ activated 2% glutaraldehyde disinfectant, 4L
#517-11-2801   MetriCide™ 28 high-level disinfectant, 1 gallon

Wipe down all surfaces regularly.
#907-100906722   Accel Prevention. 10" x 10" , 60 wipes
#517-11-1100   anti-microbial canister, 160 wipes
#507-PO10-IP70   Isopropyl alcohol, clear, 500mL

Don't forget to clean your stethoscope and blood pressure cuffs.

Indicator Tape and Notes

#831-CCIT100   "Clean" indicator tape
100m roll
#831-CCIT100D   dispenser for "Clean" indicator tape
each
#831-CCIN1000R   "Not Clean" indicator notes, red
box of 4 x 250
#831-CCIN1000G   "Clean" indicator notes, green
box of 4 x 250

#800-490

Product #	Description
#800-1322-18MM	Comply™ lead-free steam indicator tape, 0.75" x 60yd roll, beige
#800-1322-24MM	Comply™ lead-free steam indicator tape, 1" x 60yd roll, beige
#800-1262P	Attest™ biological indicators, box of 25
#800-00135LF	Comply™ Bowie-Dick plus test, bag of 6
#800-1233LF	Comply™ Bowie-Dick test pack, case of 5 x 6s
#800-1243B	Comply™ (Sterigage™) chemical integrator, bag of 100
#800-1250	Comply™ steam chemical integrator strips, 5/8" x 8", box of 240 x 2's
#800-1296	Attest™ test pack rapid readout, steam, 1 cont/pack, case of 25 packs
#800-1298	Attest™ rapid readout EO biological test packs, box of 25 + 25 controls
#800-1496V	Attest™ super rapid readout steam challenge pack, 24 controls, box of 24
#800-1491-X	Attest™ super rapid readout indicators, gravity-displacement, box of 50
#800-1492V-X	Attest™ super rapid readout Indicators, vacuum-assisted, box of 50
#242-151001EEA	Instrument marking tape, white, 0.25" x 300" roll
#175-IN-600-18	InstroMark® instrument marking tape, black, 3/8" x 200" roll
#175-IN-600-3	Instrument marking tape, Kelly green, 0.25" x 300" roll
#175-IN-600-6	Instrument marking tape, orange, 0.25" x 300" roll
#175-IN-600-7	Instrument marking tape, royal blue, 0.25" x 300" roll
